

More-than-One Health

Humans, Animals, and the Environment Post-COVID

EDITED BY IRUS BRAVERMAN

First published: 2023

ISBN: 9781032277868

Number of pages: 322

Publisher: Routledge

Description (Routledge, Taylor & Francis Group):

“This edited volume examines the complex entanglements of human, animal, and environmental health. It assembles leading scholars from the humanities, social sciences, natural sciences, and medicine to explore existing One Health approaches and to envision a mode of health that is both more-than-human and also more sensitive to, and explicit about, colonial and neocolonial legacies—urging the decolonization of One Health.

While acknowledging the importance of One Health, the volume at the same time critically examines its roots, highlighting the structural biases and power dynamics still at play in this global health regime. The volume is distinctive in its geographic breadth. It travels from Inuit sled dogs in the Arctic to rock hyraxes in Jerusalem, from black-faced spoonbills in Taiwan to street dogs in India, from spittle-bugs on Mallorca’s almond trees to jellyfish management at sea, and from rabies in sub-Saharan Africa to massive culling practices in South Korea. Together, the contributors call for One Health to move toward a more transparent, plural, and just perception of health that takes seriously the role of more-than-humans and of non-scientific knowledges, pointing to ways in which One Health can—and should—be decolonized.

This volume will appeal to researchers and practitioners in the medical humanities, posthumanities, environmental humanities, science and technology studies, animal studies, multispecies ethnography, anthrozoology, and critical public health.”
